About Me

I am a dedicated Middle Android Developer with 2 years of experience in mobile app development. I hold a Bachelor's degree in Telecommunication from TUIT with a GPA of 3. My expertise includes C++, Java, Kotlin, and various Android development tools such as Android Studio and Jetpack Compose. I have a strong understanding of SOLID principles and experience working with RESTful APIs. I have contributed to the success of projects like "Food Recipes" where I developed user-friendly features and maintained high-quality standards. With proficiency in technologies like Firebase, Retrofit, and Dagger, I am adept at creating efficient and innovative solutions. Passionate about clean architecture and continuous learning, I strive to deliver exceptional results in every project I undertake.
